PROFESSIONAL SUMMARY

Full Stack Software Developer with 4+ years of experience designing and delivering robust, scalable digital solutions. Direct contributor to the digital transformation of public administration — financial systems, document management and online payment platforms — impacting thousands of civil servants and citizens. Proven expertise across the full software development lifecycle from functional analysis to production deployment. Actively pursuing a Master's degree in AI & Big Data alongside a full-time career with a strong interest in cloud, DevOps and Artificial Intelligence.

PROFESSIONAL EXPERIENCE

Full Stack Software Developer *Mar. 2024 - Present*

Direction Générale du Trésor et de la Comptabilité Publique | Lome, Togo

Public Asset Accounting Software

- Developed critical features in Java/Spring MVC for a high-availability public financial management system
- Built the data persistence layer with My Batis, ensuring reliable and optimized access to the PostgreSQL database
- Designed a robust Spring Framework architecture guaranteeing system scalability and advanced security
- Implemented CI/CD workflows via Git, ensuring stable and consistent production releases

Tech Stack: *Java 8, Spring MVC, JSP, PostgreSQL, Jasper Reports*

TMS/X Transaction Simulator

- Built a web interface with full CRUD operations, paginated transaction history and audit logging
- Implemented secure integration with the TMS/X API via XML/SWIFT protocols and mutual SSL authentication
- Developed local transaction persistence with comprehensive error logging for full financial audit trails

Tech Stack: *Java 21, Spring Boot, Thymeleaf, Bootstrap, PostgreSQL*

SODIGER - Digital Public Revenue Collection Platform

- Led a complete UI overhaul, improving usability and accessibility for thousands of citizens and public agents
- Integrated an online payment module including user authentication, service catalog and real-time payment processing
- Implemented POS terminal (TPE) payment support and a real-time transaction monitoring dashboard
- Developed barcode scan verification and automated receipt printing functionality

Tech Stack: *Java 17, Spring Boot, PrimeFaces, Bootstrap, PostgreSQL*

GED - Electronic Document Management System (HR Dept.)

- Architected a secure, centralized document management platform with Role-Based Access Control (RBAC)
- Built an advanced search engine with multi-criteria filtering (keywords, dates, document types)
- Designed an intuitive file explorer with dynamic folder tree and granular permission management
- Implemented secure upload/download supporting standard formats (PDF, DOCX)

Tech Stack: *Java 21, Spring Boot, Angular, Bootstrap, PostgreSQL*

Software Engineer & ERP Administrator *Oct. 2023 - Feb. 2024*

IPNET Institute of Technology | Lome, Togo

- Developed new features for the SCOOLDAY platform *— +30% increase in user engagement*
- Successfully migrated codebase from Java 8 to Java 17 and Angular 8 to Angular 14, enhancing stability and security
- Optimized the ERP system, reducing downtime and improving overall platform performance
- Mentored students on practical projects and professional assignments

Tech Stack: *Java 8/17, Spring Boot, Angular 8/14, MySQL, Python*

Full Stack Java Developer *Sept. - Dec. 2023*

URIM Technologies | Lome, Togo

- Developed a property management platform for the Canadian market, streamlining rental operations end-to-end
- Built an immigration case tracking platform for specialized agencies, improving document processing efficiency

- Managed sprint planning in Jira, produced UML designs and delivered all milestones on schedule

Tech Stack: *Java 17, Spring Boot, Angular, MongoDB, Azure*

Backend Developer *Aug. 2022 - Feb. 2023*

AMSAR Digital | Lome, Togo

- SEGBAYA: developed RESTful backend services for an e-commerce platform selling digital, physical and audio books
- Implemented Spring Security for user authentication and role-based access control
- Wrote detailed technical specifications and conducted thorough business requirements analysis

Tech Stack: *Java 8, Spring Boot, Spring Security, Angular*

PERSONAL PROJECTS

Ayozia - Restaurant Management & QR Code Ordering SaaS *2025 - Present*

Personal Project | https://ayozia.cloud

- Designed and built a full-featured multi-tenant SaaS platform for restaurant management
- QR code-based table ordering system — no mobile app required, seamless experience for end customers
- Multi-cashier support: multiple simultaneous checkout points with individual session tracking
- Multi-space management with zone-based pricing (Standard, VIP) and per-area product price differentiation
- Inventory management module with real-time stock tracking and low-stock alerts
- Real-time restaurant dashboard: live orders, table status, menu management and sales statistics
- Deployed in production on a custom domain (ayozia.cloud)

Tech Stack: *Java, Spring Boot, Angular, PostgreSQL - ayozia.cloud*

TECHNICAL SKILLS

Backend	Java (Spring Boot, Spring MVC, JEE), Python, Apache Kafka, REST API, Hibernate
Frontend	Angular, TypeScript, JavaScript, Bootstrap, Thymeleaf, JSP, HTML5, CSS3
Databases	PostgreSQL, MySQL, MongoDB (NoSQL)
DevOps & Cloud	Docker, GitLab CI/CD, AWS, Linux, Git
AI & Data	NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn (fundamentals), OpenAI API, Prompt Engineering
Methodologies	Agile/Scrum, TDD, Hexagonal Architecture, UML Modeling, Continuous Integration

EDUCATION

Master's Degree in Artificial Intelligence & Big Data - ESGIS Togo ***2025 - Present***

Part-time program (evening classes) - Data Analysis, Machine Learning, Deep Learning, Big Data

Bachelor's Degree in Software Engineering - IAEC Togo *2021 - 2022*

Software Development, Application Architecture, Databases, Software Engineering

Bachelor's Degree in Human Resources Management - University of Lome *2013 - 2017*

Dual background leveraged in HR/administrative projects (Document Management, public sector digitalization)
